

Home Science (UG)

Programme Outcome

Home science has its own unique features which distinguishes itself from other subjects. It helps in improving the domestic skills of its students through knowledge in areas of housekeeping, food preservation, stitching, interior decoration, cookery, home decoration, child rearing etc. which is of wide application now a days. Five disciplines of Home Science are focused upon the recent trends in the entrepreneurship as well as job catering to various opportunities.

The Knowledge of Home Science is desired from almost all the areas of Humanities and sciences and applied towards achieving better, healthier, knowledgeable and productive individuals who would be an asset to the society, nation in general and family in particular. Along with it the knowledge of Home Science improves the quality of life by providing the homemaker with the knowledge and skills required to manage a home effectively by utilization of resources to get maximum satisfaction and returns: Family resource management, an area of the subject of Home Science imparts knowledge necessary to make intelligent decisions regarding the purchases, budgeting and other managerial activities. It also helps to improve family relationships by developing in the students the necessary skills and techniques required for better homemaking
